

DIRECT MESSAGING

Enhanced Clinical Data Messaging

Securely exchange clinical data faster and easier than ever before.

Discover and Connect

Search from a comprehensive directory of 750,000+ providers and organizations.

Reach a total of over 1,000,000 providers.

Send secure clinical messages with structured patient data between providers.

Widely Adopted Standards

Connect to other accredited EHR vendors nationwide using industry standards.

Increase interoperability by extending the reach of community partners.

Compose and Exchange Referrals

Simplify referral workflow and reduce paper/faxing.

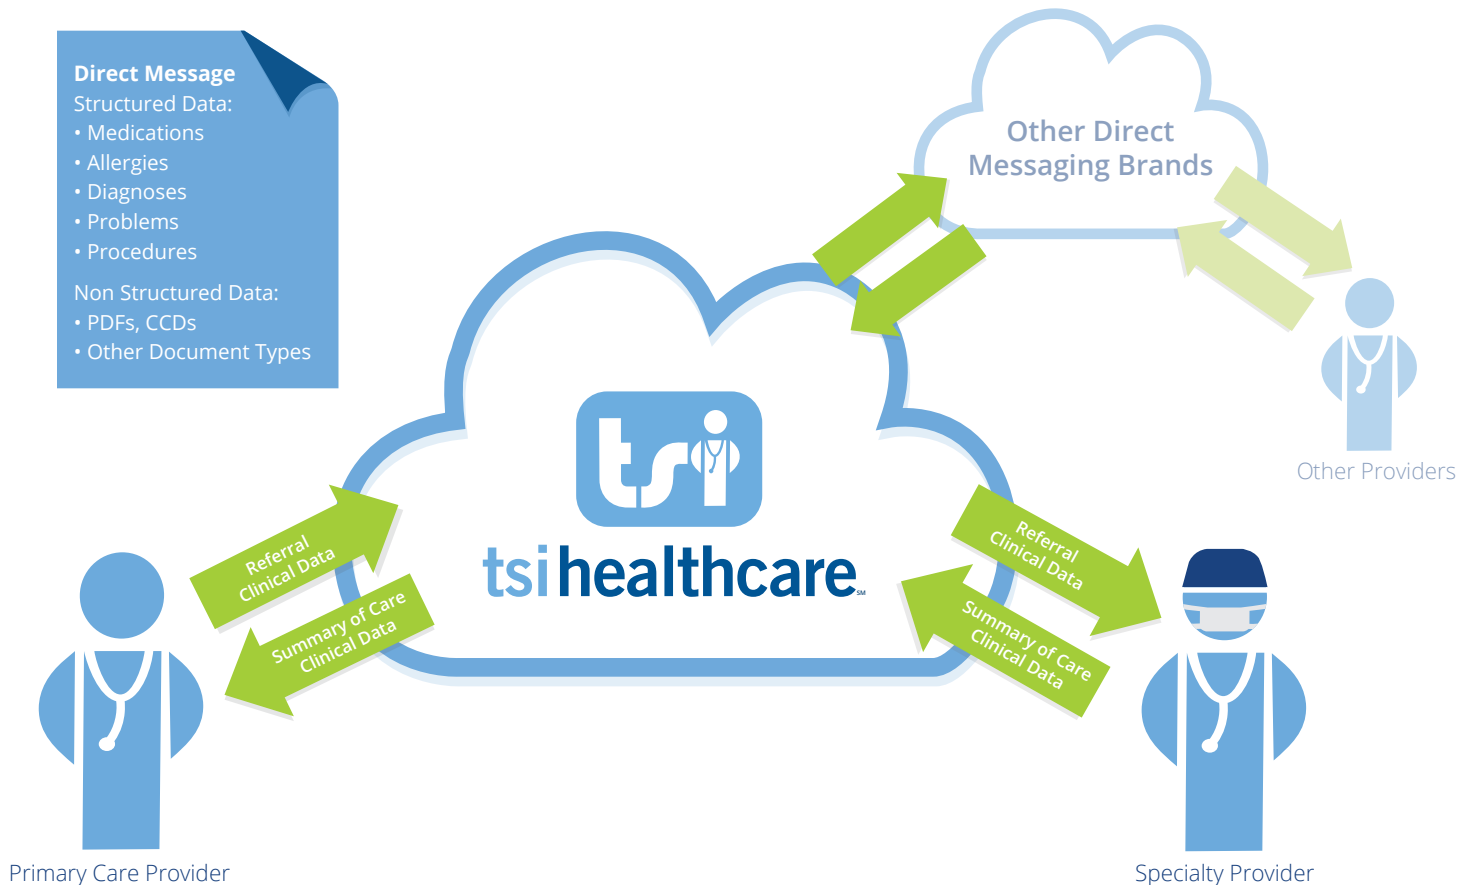

Securely share CCDs, NextGen® EHR generated documents, and other clinical patient information with providers on the network.

Import patient data from referring provider directly into your system.

Meaningful Use

Direct Messaging, now a requirement for Meaningful Use, helps you easily meet objectives.

Automate Meaningful Use calculations.

Direct Messaging Workflow

1 Find A Provider

- Search from a comprehensive directory of 750,000+ providers and organizations.
- Not in the directory? No problem. Just enter their "Direct address."

2 Compose Referral

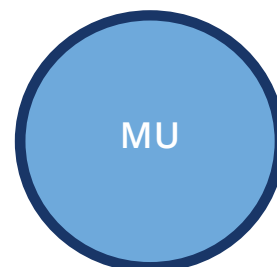

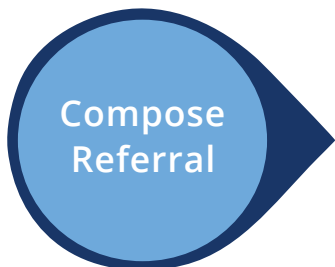

- Use the referral template to generate referral "messages" including: cover letter, CCD, and PDF attachments.
- Supports multiple attachments.

3 Send Referral

- Use the Direct protocol to transmit the newly created referral order.

4 Meaningful Use

- Automate Meaningful Use calculations.

Faster. Easier.
 With Direct Messaging, you can lower your workflow click count, reduce paper/faxing, and focus on patient care.

	Old Workflow	Direct Messaging Workflow
Applications Required	3 EHR; Rosetta; Medical Summary Utility	1 EHR
Referral Order Creation	31 Clicks	6 Clicks
External Provider Creation	21 Clicks	0 Clicks
Document Types Which Require Faxing	ICS Images HIE Documents EHR Images EHR Documents	ICS Images* HIE Documents

**ICS image sharing functionality expected in 5.8 UD2.*

Direct Trust Agent Accreditation Program (DTAAP) Member

The DTAAP validates and supports compliance with the technical, security, trust, and business practices required for Direct Messaging. TSI Healthcare's Direct Messaging solution utilizes industry leading NextGen and Mirth technology.
