

OPHTHALMOLOGY

Top Ranked Ophthalmology EHR

Ophthalmology Specific EHR Content

TSI Healthcare® is committed to partnering with ophthalmic professionals across the nation to provide a user-friendly EHR that features ophthalmology specific EHR content.

Over 500 Ophthalmic Practices

Join a growing family of eye care practices using NextGen® with proven adoption success.

Top Ranked Ophthalmic EHR

NextGen delivers an award winning ophthalmology EHR system based on number of practices, user experience AND customer satisfaction, according to the Black Book™ national survey.

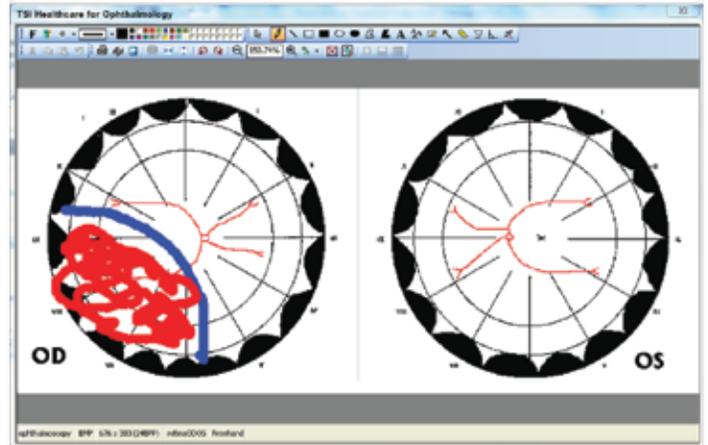

Robust Ophthalmic Features

NextGen's unique enhancements ensure you have the best tools from day one, including content for:

- General Ophthalmology
- Cataracts
- Glaucoma
- Retina
- Pediatric Ophthalmology
- Lasik
- Plastics

FAST Input Methodologies

- Smart templates with the ability to normalize, copy the last exam forward and document by exception.
- Voice recognition.
- New pen technology that transforms handwriting into discrete data.
- Ability to create, modify and incorporate drawings into your SOAP note.
- Optional inventory management system.
- Integrated web portal allowing data transfer from patients to the EHR.

An Inside Look: NextGen EHR

NextGen EHR includes ophthalmology specific draw-on charts of the eye, allowing you to easily document abnormalities with fewer mouse clicks.

Ophthalmic Device Integration

Our systems provide optional integration with all major ophthalmic device vendors, including Zeiss, Marco/Nidek, Humphrey, etc.

Available devices:

- IOL Masters
- VFA
- Autorefractors
- Lensometers
- Visual Fields
- OCT/HRT
- And many others...

One Vendor. One Support Team. One Solution.

“In today's ever changing healthcare landscape, having a relationship with TSI Healthcare has been a huge asset for the growth of our practice. TSI Healthcare understands our needs and their expertise in practice operations and customer service delivery demonstrate the high standard of commitment they provide to each of their clients.”

Jason Rubinstein
Central Florida Retina

Top Ranked Service

At TSI Healthcare, “customer service” is not just a catchphrase, it's the hallmark of our unrivaled business approach.

Tailored Set-Up & Installation

Our on-site workflow studies provide your team with a customized implementation plan tailored to your practice needs.

Personalized Training

Our EHR trainers deliver an added level of ophthalmology specific knowledge, while our practice management system experts include former practice administrators. These experts ensure success by leveraging experience in your specialty.

Live Call Support

TSI Healthcare provides live call triaging to achieve an average support response time of two (2) hours, compared to the industry average of two (2) days. Our team members are NextGen® certified professionals based in the USA.

Meaningful Use Assistance

Hands-on regulatory training provides an added layer of guidance so you can focus on patient care.

Revenue Cycle Management

TSI Healthcare Revenue Cycle Management (RCM) is an optional service that puts the power of an expert billing company at your disposal, from claims submission to patient collections.

On-Going Evaluation

Regular evaluations by our expert team help you discover new features, functionality, and maximize utilization from day one.

“We chose TSI Healthcare because they came highly recommended from several different providers. Knowing they have experts in the field and knowing that they are all NextGen certified professionals made a world of difference. Our practice is a big family and I feel as though we have an extended family now.”

Cathy Henney
Bennett & Bloom Eye Centers, P.A.

Award Winning Software

We've partnered with the industry-leading software developers at NextGen® Healthcare to bring you the best features and functionality.

NextGen® EHR - Top Features

Improve clinical processes through fast documentation methods, smart efficiency features, and enhanced connectivity.

- **Meaningful Use Certified.**
- **Intuitive Coding** helps ensure maximum reimbursement based on provider documentation.
- **Optical Shop Inventory Management** allows you full inventory control.
- **IRIS™ Registry** gives you access to the world's first comprehensive eye disease clinical registry.
- **Plus additional enhancements created *exclusively for TSI Healthcare Ophthalmology clients.***

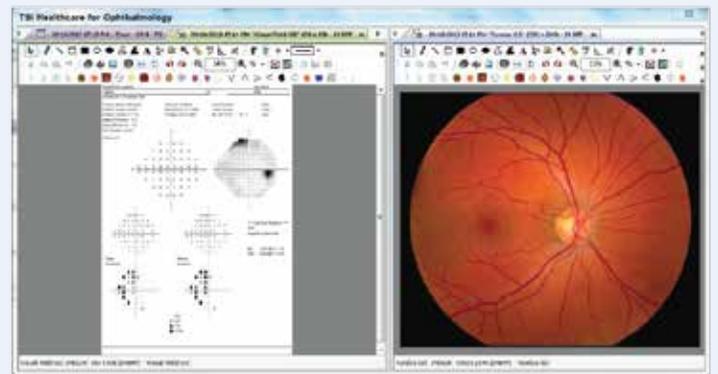

NextGen® PM - Top Features

Maximize your business operations through powerful practice management features, industry connectivity, and process automation.

- **Multi-View Scheduling** displays information based on location, resource, and other options.
- **Advanced Appointment Search** delivers available times using basic or detailed patient information.
- **Autoflow Registration** includes computer guided sequences.
- **Robust Reports Library** delivers drill-down capability.
- **Background Business Processor** generates automated reports overnight.

An Inside Look: NextGen EHR

NextGen EHR connects to ophthalmic devices* via optional interfaces, delivering the ability to view and document using Visual Field & Fundus Photo images directly in the patient chart.

Optional Cloud-Based Hosting

Practices may choose our "cloud-based" ASP model instead of hosting your own servers, so you can forget about hardware and focus 100% on your patients.

NextGen® Population Health

Integrated platform utilizing "intelligent" clinical profiles to automatically select and communicate with patients about their unique preventative and follow-up care needs.

Device Integration and Direct Messaging

Our systems provide optional device integration with all major connectivity partners including Zeiss, Marco/Nidek, Humphrey, and many more. Direct Messaging delivers the ability to exchange clinical data with your peers.

NextGen® Patient Portal

Fully integrated functionality with direct connectivity to NextGen EHR and PM, including: online statements, bill pay, access to patient clinical information, and more.

NextGen NextPen™

Revolutionary digital pen technology converts patient or provider handwritten information into discrete data within the EHR. Includes a library of Ophthalmology specific forms.

Automated Patient Reminders

Securely communicate appointment reminders, collections notices, and practice updates utilizing the data already in your Practice Management.

Recognizing Success

As a private company, we succeed only when you do. Our dedication to client success is further showcased by the awards from industry leading groups and publications.
