

RHEUMATOLOGY

A Top Ranked Rheumatology EHR

Rheumatology Specific EHR Content

TSI Healthcare® is committed to partnering with rheumatologists across the nation to provide a user-friendly EHR that features rheumatology specific EHR content.

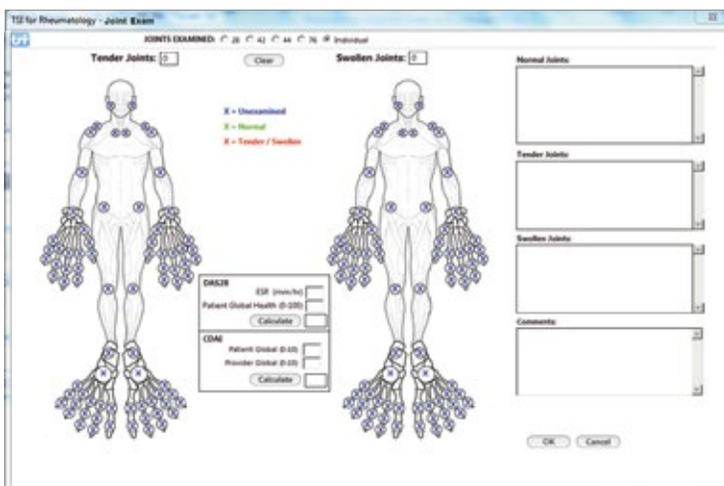

A Top Ranked Rheumatology EHR

TSI Healthcare delivers an award winning rheumatology EHR system based on support, user experience, and client satisfaction, according to the Black Book™ national survey.

Over 500 Rheumatology Specific Enhancements

TSI Healthcare's unique enhancements to NextGen EHR ensure you have the best tools from day one, including:

- Documentation for: RA, lupus, osteoporosis, gout, osteoarthritis, Sjogren's syndrome, ankylosing spondylitis, fibromyalgia, spondyloarthropathy, PMR, carpal tunnel syndrome, scleroderma, vasculitis, and more.
- Joint Exam featuring a color-coded homunculus diagram with built in algorithms for disease score trending.
- ScoreCard™ captures and trends disease scores like:
 - RAPID3, CDAI, DAS28, SLEDAI, ASAS, SDAI, BASDAI, HAQII, ESR, CRP, Grip Strength, FIQR, BASMI, Tender/Swollen Joints.
- Outcomes tracking compares disease activity scores directly against treatments, biologics & medications (started and stopped).
- Automated infusion billing accurately generates charges based on medication administered and duration of infusion.
- Single-click copy forward functionality for side-by-side workflow comparison of previous to current encounters.
- Flexible documentation to accommodate individual workflows within your practice including quick-save templates, voice recognition, free text, and a new digital pen technology.

An Inside Look: NextGen EHR

TSI Healthcare delivers exclusive enhancements including a Joint Exam for tender and swollen joints.

Approaching 400 Rheumatologists

1 in 3 rheumatologists with an EHR use NextGen®. In fact, no other vendor has more rheumatology clients live on EHR.* Join a growing family of providers with proven adoption success.

Rheumatology Content Updated Regularly

With a team of rheumatology developers and providers dedicated to rheumatology content development, we continuously improve your system.

Guidance from Rheumatology Board of Advisors

Design and functionality enhancements suggested by rheumatologists, for rheumatologists.

One Vendor. One Support Team. One Solution.

“TSI Healthcare delivers an EHR that actually helps our specialty provide better patient care. It’s truly an EHR built for Rheumatologists by Rheumatologists. The only thing better than their custom content is TSI Healthcare’s support, which exceeds all expectations.”

C. Michael Franklin, MD
Rheumatic Disease Associates

Top Ranked Service

At TSI Healthcare, “customer service” is not just a catchphrase, it’s the hallmark of our unrivaled business approach.

Tailored Set-Up & Installation

Our on-site workflow studies provide your team with a customized implementation plan tailored to your practice needs.

Personalized Training

Our EHR trainers deliver an added level of rheumatology specific knowledge, while our practice management system experts include former practice administrators. These experts ensure success by leveraging experience in your specialty.

Live Call Support

TSI Healthcare provides live call triaging to achieve an average support response time of two (2) hours, compared to the industry average of two (2) days. Our team members are NextGen® certified professionals based in the USA.

Meaningful Use Assistance

Hands-on regulatory training provides an added layer of guidance so you can focus on patient care.

Revenue Cycle Management

TSI Healthcare Revenue Cycle Management (RCM) is an optional service that puts the power of an expert billing company at your disposal, from claims submission to patient collections.

On-Going Evaluation

Regular evaluations by our expert team help you discover new features, functionality, and maximize utilization from day one.

“There are several templates that TSI Healthcare has introduced to us that we find very, very useful; specifically the infusion template. We do a lot of in office infusions in our practice and that template has really improved documentation and ease of use for our infusion nurses.”

Alan K. Matsumoto, MD
Arthritis & Rheumatism Associates of Maryland

Award Winning Software

We've partnered with the industry-leading software developers at NextGen® Healthcare to bring you the best features and functionality.

NextGen® EHR - Top Features

Improve clinical processes through fast documentation methods, smart efficiency features, and enhanced connectivity.

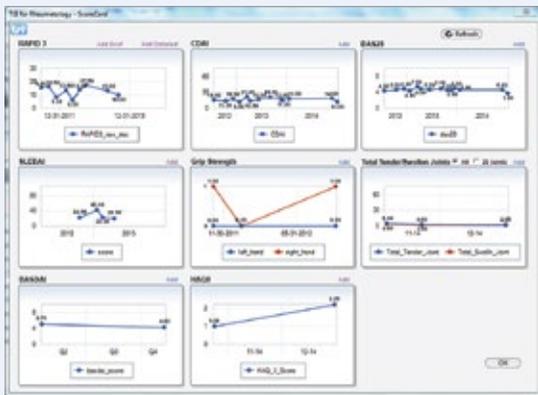

- **Meaningful Use Certified.**
- **TSI Healthcare for Rheumatology Joint Exam** provides a quick and familiar way to record joint symptoms and severity.
- **TSI Healthcare for Rheumatology ScoreCard™** displays disease active scores graphically across patient encounters (picture below).
- **TSI Healthcare for Rheumatology Outcomes Tracking** compares disease activity scores directly against treatments, biologics, & started/stopped medications (picture below).
- Plus over 250 additional enhancements created exclusively for TSI Healthcare Rheumatology clients.

NextGen® PM - Top Features

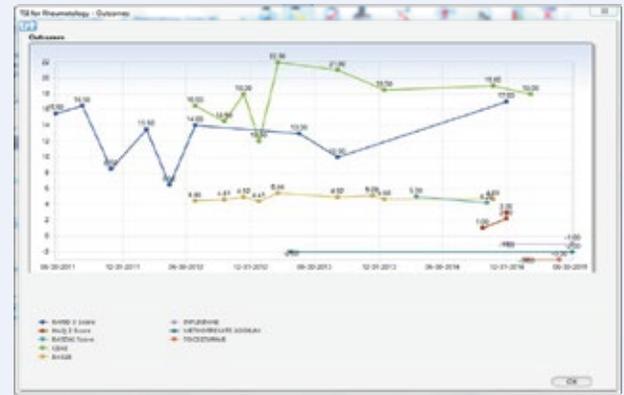

Maximize your business operations through powerful practice management features, industry connectivity, and process automation.

- **Multi-View Scheduling** displays information based on location, resource, and other options.
- **Advanced Appointment Search** delivers available times using basic or detailed patient information.
- **Autoflow Registration** includes computer guided sequences.
- **Worklog Manager** automates tasks based on business rules.
- **Robust Reports Library** delivers drill-down capability.
- **Background Business Processor** generates automated reports overnight.

Rheumatology ScoreCard™

TSI Healthcare for Rheumatology ScoreCard™ is a one-page graphical trend view of the patient's RAPID3, CDAI, DAS28, SLEDAI, ASAS, SDAI, BASDAI, HAQII, ESR, CRP, Grip Strength, FIQR, BASMI, and Tender/Swollen Joints .

Rheumatology Outcomes Tracking

Rheumatology outcomes tracking compares disease activity scores directly against treatments, biologics, & medications (started and stopped).

Optional Cloud-Based Hosting

Practices may choose our "cloud-based" ASP model instead of hosting your own servers, so you can forget about hardware and focus 100% on your patients.

NextGen® Population Health

Integrated platform utilizing "intelligent" clinical profiles to automatically select and communicate with patients about their unique preventative and follow-up care needs.

Connectivity and Direct Messaging

Our systems provide optional integration with all major connectivity partners including RISE, TheraTest, LabCorp, Quest, and many more. Direct Messaging delivers the ability to exchange clinical data with your peers.

NextGen® Patient Portal

Fully integrated functionality with direct connectivity to NextGen EHR and PM, including: rheumatology online forms, online statements, bill pay, access to patient clinical information, and more.

NextGen NextPen™

Revolutionary digital pen technology converts patient or provider handwritten information into discrete data within the EHR. Includes a library of Rheumatology specific forms.

Automated Patient Reminders

Securely communicate appointment reminders, collections notices, and practice updates utilizing the data already in your Practice Management.

Recognizing Success

As a private company, we succeed only when you do. Our dedication to client success is further showcased by the awards from industry leading groups and publications.
