

PULMONARY & SLEEP MEDICINE

#1 Pulmonary & Sleep Medicine EHR

Pulmonary & Sleep Medicine Specific EHR Content

TSI Healthcare® is committed to partnering with pulmonary professionals across the nation to provide a user-friendly EHR that features pulmonary specific documentation.

#1 Pulmonary & Sleep Medicine EHR

TSI Healthcare delivers the leading pulmonary & sleep medicine EHR system based on support, user experience, and client satisfaction.

Over 400 Pulmonary & Sleep Medicine Specific Enhancements

TSI Healthcare's unique enhancements to NextGen® EHR ensure you have the best tools from day one, including:

- Documentation for abnormal pulmonary study, allergies, asthma, bronchitis, cough, COPD, cystic fibrosis, dyspnea, insomnia, pulmonary fibrosis, pulmonary hypertension, restless leg syndrome, sarcoidosis, sinus disease, central sleep apnea, obstructive sleep apnea, and more.
- Procedural templates for bronchoscopy, percutaneous biopsy, pulse oximetry, PFT findings, six minute walk results, spirometry, thoracentesis, and Xolair injections.
- Streamlined ordering for DME and sleep tests including Polysomnogram, Actigram, MSLT, MWT, and more.
- ScoreCard™ showing multiple patient data points in real-time including spirometry, pulse oximetry, sleepiness scale, ACT score, vitals over time, insomnia severity index, & QIDS score.
- Pulmonary “home screen” provides physicians with a brief summary of the patient chart, including chest x-rays, chest CT scans, and vaccines.
- Flexible documentation to accommodate individual workflows within your practice including quick-save templates, voice recognition, free text, and a new digital pen technology.

Approaching 300 Pulmonologists

Join a growing family of physician practices using TSI Healthcare with proven adoption success.

Content Updated Regularly

With a team of pulmonary & sleep medicine developers and providers dedicated to specialty content development, we continuously improve your system.

Guidance from Specialty Board of Advisors

Design and functionality enhancements suggested by pulmonary & sleep medicine professionals, for pulmonary & sleep medicine professionals.

Pulmonary Device Connectivity

Our systems provide optional integration with Welch Allyn, MidMark, GE Cardiosoft, CareFusion Vmax, and Morgan Scientific.

One Vendor. One Support Team. One Solution.

“TSI Healthcare team members are knowledgeable about the intricacies of Pulmonary and Sleep Medicine professionals. They have developed pulmonary specific enhancements that enable me to track medications and diagnoses easily. Their hands-on approach to federal policy assistance gives me confidence that we will be successful with MIPS today and in the future.”

Mark M. Chung, MD

Top Ranked Service

At TSI Healthcare, “customer service” is not just a catchphrase, it’s the hallmark of our unrivaled business approach.

Tailored Set-Up & Installation

Our on-site workflow studies provide your team with a customized implementation plan tailored to your practice needs.

Personalized Training

Our EHR trainers deliver an added level of pulmonary & sleep medicine specific knowledge, while our practice management system experts include former practice administrators. These experts ensure success by leveraging experience in your specialty.

Live Call Support

TSI Healthcare provides live call triaging to achieve an average support response time of two (2) hours, compared to the industry average of two (2) days. Our team members are NextGen certified professionals based in the USA.

On-Going Evaluation

Regular evaluations by our expert team help you discover new features, functionality, and maximize utilization from day one.

Revenue Cycle Management

TSI Healthcare Revenue Cycle Management (RCM) is an optional service that puts the power of an expert billing company at your fingertips, from claims submission to patient collections.

Quality Program Services

Hands-on regulatory training provides an added layer of guidance so you can focus on patient care.

“We’ve selected TSI Healthcare because of their reputation for excellent service. They proved to be well above average, especially when it came to implementation and training. Their commitment to pulmonary medicine convinced us we had made the right decision.”

Al M. Heyder, MD
Atlantic Pulmonary Associates

Award Winning Software

We've partnered with the industry-leading software developers at NextGen Healthcare to bring you the best features and functionality.

NextGen® EHR - Top Features

Improve clinical processes through fast documentation methods, smart efficiency features, and enhanced connectivity.

- **TSI Healthcare for Pulmonary ScoreCard™** displays test scores graphically across patient encounters (picture below).
- **TSI Healthcare for Pulmonary Lung Cancer Screening Template** assists with payer approval for Low-Dose CT based on parameters for age and pack year history (picture below).
- **TSI Healthcare for Pulmonary Outcomes Tracking** compares disease activity scores directly against started/stopped medications.
- Plus over 400 additional enhancements created **exclusively** for TSI Healthcare Pulmonary & Sleep Medicine clients.

Pulmonary ScoreCard™

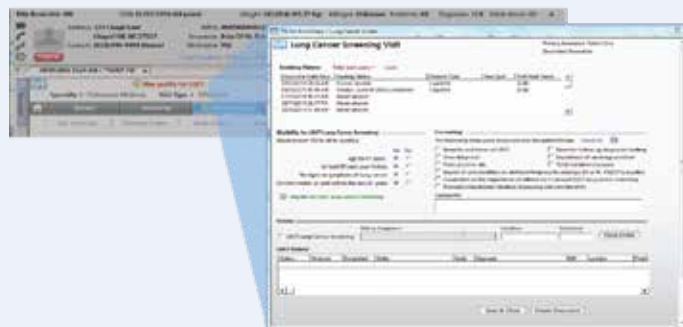

TSI Healthcare provides a pulmonary ScoreCard™ which displays multiple patient data points in real-time including spirometry, pulse oximetry, sleepiness scale, STOP-bang, BODE, mMRC, ACT score, vitals over time, insomnia severity index, & QIDS score.

NextGen® PM - Top Features

Maximize your business operations through powerful practice management features, industry connectivity, and process automation.

- **Multi-View Scheduling** displays information based on location, resource, and other options.
- **Advanced Appointment Search** delivers available times using basic or detailed patient information.
- **Autoflow Registration** includes computer guided sequences.
- **Worklog Manager** automates tasks based on business rules.
- **Robust Reports Library** delivers drill-down capability.
- **Background Business Processor** generates automated reports overnight.

Pulmonary Lung Cancer Screening Template

TSI Healthcare provides a lung cancer screening template to assist with payer approval for Low-Dose CT based on parameters for age and pack year history.

Optional Cloud-Based Hosting

Practices may choose our "cloud-based" ASP model instead of hosting your own servers, so you can forget about hardware and focus 100% on your patients.

Population Health Plus

Integrated platform utilizing "intelligent" clinical profiles to automatically engage with patients about their unique preventative and follow-up care needs. Dedicated care concierge provides proactive guidance.

Connectivity and Direct Messaging

Our systems provide optional integration with all major connectivity devices including Welch Allyn, MidMark, GE CardioSoft, CareFusion Vmax, Morgan Scientific, and many more. Direct Messaging and the Carequality Datashare deliver the ability to exchange clinical and patient data with peers.

NextGen® Patient Portal

Fully integrated functionality with direct connectivity to NextGen EHR and PM, including: online statements, bill pay, access to patient clinical information, and more.

NextGen NextPen™

Revolutionary digital pen technology converts patient or provider handwritten information into discrete data within the EHR.

Automated Patient Reminders

Securely communicate appointment reminders, collections notices, and practice updates utilizing the data already in your Practice Management.

Recognizing Success

As a private company, we succeed only when you do. Our dedication to client success is further showcased by the awards from industry leading groups and publications.
