

Orders Module – Reconcile Lab Results

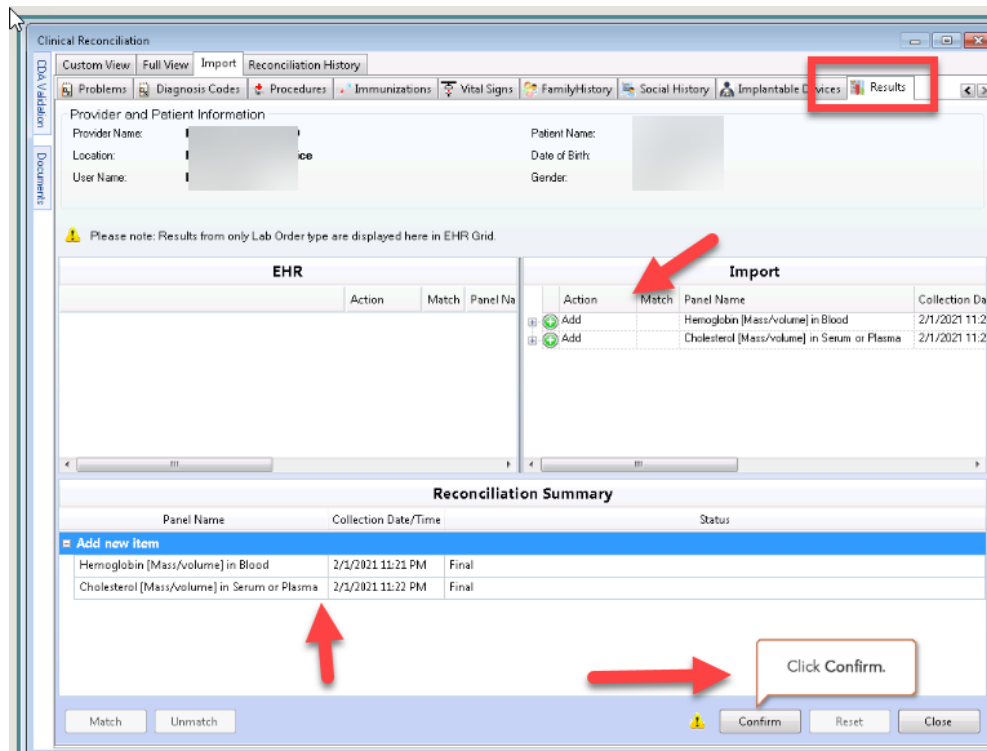

In 6.2021.1 – Users will have the ability to reconcile and import Lab results from an incoming CCDA. Using the Imported filter, users can refresh, delete, track or reconcile lab results. (Appropriate permissions in system admin user groups are required)

Reconcile CCD-A Lab Results directly into the Orders Module

1. Open a Patient's Chart and Launch the Orders Module
2. Select the Order Summary Tab
3. Select Reconcile to launch the Clinical Reconciliation window

4. Select the Results Tab and follow the standard reconcile workflow

Nextgen 6.2021 Enhancements

Orders Module – Reconcile Lab Results

PREPARE

View Imported Results:

1. To view the imported results, select the Results tab
2. The user can choose to Show or Hide imported results using the filter checkbox

The screenshot shows the 'Order Module' window with the 'Results' tab selected. The interface includes a filter bar with 'View results by Resources' and a checkbox for 'Hide Imported Results' which is checked and highlighted with a red box. Below the filter, a table displays lab results grouped by 'Albumin' and 'ALT (SGPT)'. The table has columns for 'Collection Date & Time' and five specific dates: 12/28/2015 16:03, 11/18/2015 12:09, 10/27/2015 11:52, 10/08/2015 15:18, and 04/01/13.

Collection Date & Time	6	12/28/2015 16:03 *	11/18/2015 12:09 *	10/27/2015 11:52 *	10/08/2015 15:18 *	04/01 13
Albumin						
Albumin						
Albumin, Serum						
A/G Ratio		2.0				3.5
Albumin, Serum		5.0				3.2
Globulin, Total		1.0				1.6
ALT (SGPT)						
ALT (SGPT)
