

SubQ/IM Template

In TSI 2022 RHE Content, the SubQ/IM template has been redesigned from a pop-up template to a medical record template for easier navigation and access.

Updated Instructions Directly on the template

SubQ/IM Injection Pre-Infusion Screening (Patient Interview, Allergies, Labs)

Specialty ▼ Rheumatology Visit Type ▼ Nurse Visit

Load Save Panel Control: Toggle Cycle

How to Use This Template

Change from pop-up to medical records template:

1. Easier navigation & access
2. Allows the user to keep the template open and navigate to other areas of the chart
3. Allows users to view from the Patient History tab under an encounter
4. Larger viewable area

Visit type configurable

1. Configuration option allows the Practice to set the visit type as a configuration option
2. Users still have the ability to update the visit type if needed

Easier documentation of Standing or Future order:

1. Enhanced feature allows the user to select and populate details from the standing/future orders grid to today's administration section.
2. Added Tasking feature directly from the administration section
3. Users can complete an order directly from the template

Generates and Saves Procedure Document:

1. Print option available
2. Enhanced feature will generate and save the document to an encounter
